

SCREW TYPE EMI FILTERS [FTA Series]

The FTA series are extremely small, highly reliable EMI filters for a wide range of frequency, and are suited for high frequency noise and EMI control.

For this series, a feed through type ceramic capacitor with an extremely high self-resonating frequency is soldered into a threaded metal shell, and sealed with resin.

Metric thread type

Part Number List • Specifications for M3 Thread Type

Part number	Capacitance	Capacitance tolerance	Rated voltage	Withstanding voltage	Rated current	Temperature characteristics	Temp. range	Insertion loss	Style		
FTA302AC060KAAG-S	6pF	±10%	100Vdc	250Vdc	10Adc	CG (0±30ppm/°C)	-55~+125°C	①	Style 1

Soldering to chassis

When using a soldering Type (FTA3S,56S), please use the following method.

- Recommended Solder
Use low-melting solder of which melting temperature is 165°C max.
- Recommended Method
Use reflow soldering. Avoid rapid heating/cooling, preheat to around 130°C, and then process at 220°C in the reflow zone for 10 sec. max.
- Recommended hole size for soldering

FTA 3S	3.4
FTA56S	5.8
